

GENETIC TECHNOLOGIES, INC.

Forensic DNA / Serology / Relatedness Testing ®

Genetic Technologies, Inc. is an ASCLD/LAB-*International*, NYSDOH, and AABB Accredited facility specializing in the discipline of forensic biology.

Job Opening: Technical Leader

Facility Location: Glencoe, Missouri

Starting Pay: \$45,000-\$67,000 per year commensurate with qualifications and experience. Employees also benefit from a company revenue sharing program and additional benefits.

Job Description: The Technical Leader must successfully complete an internal training program, competency tests, and proficiency test within the first 180 days of employment. The qualified Technical Leader will demonstrate proficiency in evidence examination, serology, microscopy, DNA extractions, Real Time PCR, autosomal, Y-STR and MiniFiler amplification, capillary electrophoresis and data interpretation .

The Technical Leader shall manage the technical operations of the laboratory and is responsible for evaluating all methods used by the laboratory and for proposing new or modified analytical procedures to be used by the technical staff.

The Technical Leader is responsible for technical problem solving of analytical methods and for the oversight of training, quality assurance, safety and proficiency testing in the laboratory.

The Technical Leader is responsible for ensuring Genetic Technologies, Inc. complies with the standards set forth by the AABB (7th Edition) NYSDOH, and ASCLD/LAB – International.

The Technical Leader will maintain a caseload in addition to their supervisory tasks.

Qualifications: The Technical Leader must have a minimum of a Graduate Degree in a biological, chemical, or forensic science and have received credit for courses in population genetics, biochemistry, and molecular biology (molecular genetics or recombinant DNA technology) or other subjects which provide a basic understanding of the foundation of forensic DNA analysis. Must have obtained training in statistical analysis as it applies to population genetics.
